- 6. (Currently Amended) A process according to Claim [[4]] 5 wherein the exposed purine bases of single-stranded undesired (or desired) nucleic acids facilitate a separation step selected from the group consisting of: immobilized metal affinity chromatography (IMAC).
- 7. (Currently Amended) A process according to Claim [[1]] 5 comprising introducing single strandedness as an exposed purine base.
- 8. (Currently Amended) A process according to Claim [[1]] 5 comprising a thermally based process in which a nucleic acid contaminant is rapidly cooled to below 65°C and is captured by an affinity method.
- 9. [Currently Amended] A process according to Claim [[1]] 5 performed after an alkali based process in which genomic DNA or other nucleic acid contaminant is rapidly neutralized and is captured by an affinity method.
- 10. (Cancelled)
- 11. (Currently Amended) A process according to Claim [[1]] 5 wherein undesired other plasmid isoforms selected from the group consisting of open circular ("nicked") and linear plasmid isoforms are selectively removed from the desired supercoiled plasmid DNA product.
- 12. (Previously Presented ) A process according to Claim 9 wherein undesired other plasmid isoforms selected from the group consisting of open circular

## 13. [Cancelled]

- 14. (Currently Amended) A process according to Claim [[1]] 5 in which the separation is achieved by adsorption on chelated metal.
- 15. (Currently Amended) A process according to Claim [[1]] 5 in which the separation is achieved using multi-channel plates.
- 16. (Currently Amended) A process according to Claim 54 wherein the desired product comprises Taq polymerase.
- 17. (Currently Amended) A process according to Claim [[1]] 5 in which the separation is achieved using magnetic particles.
- 18. (Currently Amended) A process according to Claim [[1]] 5 in which the separation of multiple samples is achieved in parallel fashion.
- 19. (Currently Amended) A process according to Claim [[1]] 5 in which the captured nucleic acid comprises a moiety selected from BACs, PACs and YACs.
- 20. (Currently Amended) A process according to Claim [[1]] 5 in which the captured nucleic acid comprises a plasmid.
- 21. (Currently Amended) A process according to Claim [[1]] 5 in which the captured nucleic acid comprises genomic DNA.

22. (Currently Amended) A process according to Claim [[1]] 5 in which the captured nucleic acid comprises RNA.

Richard C. Willson, Jr.

- 23. (Currently Amended) A process according to Claim [[1]] 5 in which the capture technique comprises HIC.
- 24. (Currently Amended) A process according to Claim [[1]] 5 in which the capture technique comprises RPC.
- 25. Cancelled
